EDUCATION

University of Otago | Dunedin, New Zealand

Feb. 2025 - Nov. 2027

Bachelor of Science, Majors in Computer Science and Mathematics

- **Computer Science GPA:** 8.2 / 9.0
- **Relevant Coursework:** Data Structures & Algorithms, Computer Organization, Operating Systems, Databases, Software Development

TECHNICAL SKILLS

Languages (ordered by proficiency): Java, Python, SQL, C++, Bash

Frameworks/Libraries: Spring Boot, Java Swing

Tools: Git, Maven, Gradle, PostgreSQL, Docker

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Version Control Systems, Database Design

RELEVANT EXPERIENCE

University of Otago, School of Computing | Dunedin, New Zealand

Jul. 2026 - Current

Undergraduate Lab Demonstrator/Assistant

- Chosen based on top academic performance in COMP161(A+) and COMP162 (A+) to support first-year Computer Science labs
- Help first year students work through Java and Python programming, data structures, and basic algorithms
- Support students by debugging their code alongside them and explaining concepts
- Work alongside teaching staff during labs to help sessions run smoothly

PROJECTS

VersionHandle | *Personal Project* | [GitHub](#)

Apr. 2026

- Built a Git-like version control system in Java supporting commits, branching, checkout, and staging using SHA-256 object storage and snapshot reconstruction.
- Implemented file hashing, index staging, and working directory restoration, allowing command execution on past project states for debugging and testing.
- Designed commit graph and branching logic to manage version history and support efficient state transitions

IssueFlow | *Personal Project* | [GitHub](#) | [Live Site](#)

May. 2026

- Built and deployed a full-stack issue tracking app using Spring Boot, React, PostgreSQL, and Docker.
- Implemented JWT authentication, protected REST APIs, repository membership, issue tracking, and comments.
- Configured Vercel and Render deployment with HTTPS custom domains, hosted PostgreSQL, and Resend API email verification.

ANDIE | *Group Project*

Mar. 2026

- Developed a non-destructive image editor using Java Swing/AWT with resizing, colour transformations, and drawing tools.
- Built modular ImageOperation features including region selection, bilinear scaling, and custom rendering with Graphics2D.
